FIG. 1 illustrates a surgical instrument assembly 100 positioned over a patient's knee joint 115. The assembly includes a handle 120, a shaft 140, and a distal end 130. A tensioning mechanism 200 is shown applying tension to the shaft 140 via a cable 210 and pulleys 230. A dashed line 135 indicates the intended path of the instrument tip 80.

FIG. 30

FIG. 31

FIG. 1 is a schematic diagram of a knee joint illustrating the placement of a ligament graft 100. The graft is positioned between the femur 115 and the tibia 125. It is secured by sutures 80 and 85. Dashed lines represent the original paths of the anterior cruciate ligament (ACL) 130 and posterior cruciate ligament (PCL) 135. Other labeled components include the patella 120, the graft itself 100, and various anatomical features like the tibial plateau 105 and the intercondylar notch 250. The graft is shown as a thickened band of tissue.
